

Software

Python:

Python is commonly used for developing websites and software, task automation, data analysis, and data visualization. Since it's relatively easy to learn, Python has been adopted by many non-programmers such as accountants and scientists, for a variety of everyday tasks, like organizing finances.

A screenshot of a Windows command prompt window titled "Python 3.7 (32-bit)". The window has a standard Windows title bar with minimize, maximize, and close buttons. The command prompt shows the Python 3.7.4 version information and the prompt ">>>".
